

THE DISCOVERER

Of Lydia E. Pinkham's Vegetable Compound, the Great Woman's Remedy for Woman's Ills.

Yours for Health
Lydia E. Pinkham

No other female medicine in the world has received such widespread and unqualified endorsement.

No other medicine has such a record of cures of female troubles or such hosts of grateful friends as has

Lydia E. Pinkham's Vegetable Compound.

It will entirely cure the worst forms of Female Complaints, all Ovarian Troubles, Inflammation and Ulceration, Falling and Displacement of the Womb, and consequent Spinal Weakness, and is peculiarly adapted to the Change of Life.

It has cured more cases of Backache and Leucorrhoea than any other remedy the world has ever known. It is almost infallible in such cases. It dissolves and expels tumors from the Uterus in an early stage of development.

Irregular, Suppressed or Painful Menstruation, Weakness of the Stomach, Indigestion, Bloating, Flooding, Nervous Prostration, Headache, General Debility quickly yield to it. Womb troubles, causing pain, weight and backache, instantly relieved and permanently cured by its use. Under all circumstances it invigorates the female system, and is as harmless as water.

It quickly removes that "bearing-down" feeling, irritability, nervousness, Dizziness, Faintness, sleeplessness, flatulency, melancholy or the "blues" and headache. These are sure indications of Female Weakness, or some derangement of the Uterus, which this medicine always cures. Kidney Complaints and Backache, of either sex, the Vegetable Compound always cures.

Those women who refuse to accept anything else are rewarded a hundred thousand times, for they get what they want—a cure. Sold by Druggists everywhere. Refuse all substitutes.

CITY TO PAY HALF.

Sprinkling Streets Problem in St. Albans Adjusted.

St. Albans, May 19.—About twenty of the prominent business men of the city met with Aldermen E. M. Blake, N. N. Atwood, and N. J. Jarvis, the city council committee on water, at the council chamber in the city hall building to talk over the street sprinkling question. It was decided that the council would pay for half the sprinkling and the business men the other half. This was satisfactory to the business men present and the matter will doubtless be settled in that manner although a canvass of the business men will be made to ascertain how much money can be raised for the purpose.

Inasmuch as the business men have had to pay for the street sprinkling entirely in former years they feel that

the action of the council is a decided step in the direction of the city sprinkling the streets.

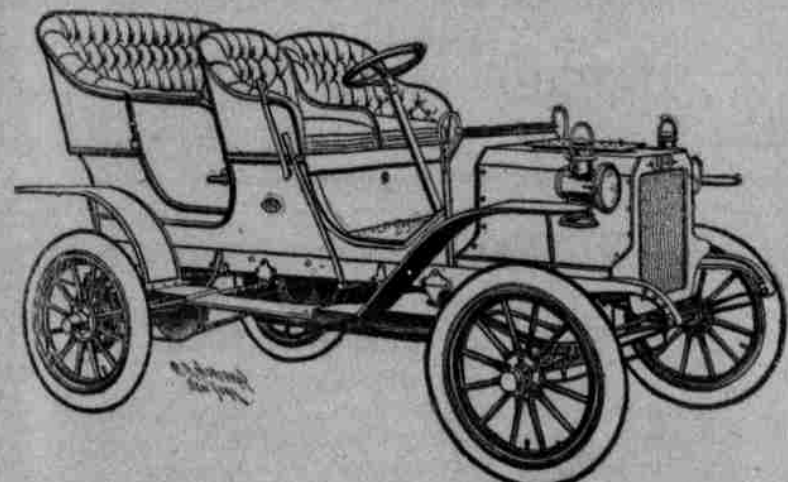

Commencement Speakers at M. S.

Nearly all the speakers of the commencement of Montpelier Seminary have been selected, those chosen because of scholarship being S. E. D. Allen, Harvard; Miss Grace Perkins, Wellesley; Misses Jessie Marvin and Emma Collins, of Montpelier; Miss M. Idella Prouty, of Peru; and Leon J. Morse, of Montpelier. Those selected because of the merit of the papers written and passed upon are Harold Sawyer, of Brooklyn, N. Y.; Freeman, of Lowell; Miss Margaret Fries, of Newport Center; A. K. Wilkey, of Tiptonville; and Miss Mary Chayer, of Lyndeville.

Two more speakers are to be selected later. The class numbers about 25 this year.

Ayer's Cherry Pectoral. When threatened with consumption. It controls the cough, allays inflammation, soothes, heals. Even in advanced cases, it sometimes cures, always relieves. J. C. Ayer & Co., Lowell, Mass.

Reo 5-Passenger Touring Car!

Two-cylinder horizontal 16 h. p., with long hill-climbing stroke. Weight 1500 lbs., with detachable tourer. Price \$1250. Also can furnish Reo Runabout, 8 h. p., 850 lbs., at \$650. Both equipped with two lamps and horn. The Reo is invented and built by R. E. Olds, the inventor of the Oldsmobile. Will be pleased to give demonstrations. E. N. ALDRICH, Agent, Graniteville, Vt.

CHADWICK FINANCE

Cleveland's Condemned Woman Plunger

MAKES A STATEMENT

\$5,210,000 in Four Years This the Sum She Has Handled, \$900,000 of Which Was Borrowed, She Says.

Cleveland, O., May 19.—Mrs. Cassie L. Chadwick made a statement for publication last night concerning her affairs, in the course of which she said:

"Since Jan. 1, 1901, I have had \$5,210,000. Of this amount I borrowed not more than \$900,000, the remainder coming from a trust fund and some sales.

"In April or May, 1901, I owed only \$53,000. I paid that debt. I was then induced to make an investment which called for almost \$400,000. I took no security for this investment, and the transaction, so far as I am concerned, never materialized. The investment was made upon the advice of a friend.

After relating her experience while abroad, during which time her husband and her niece were ill for several months, Mrs. Chadwick said:

"Early in the month of February, 1902, after my return home, I was informed that my investment was a loss and that I was in debt \$100,000. Besides that sum there was an additional loss which I had incurred of \$200,000. In order to meet these obligations I borrowed large sums for which I paid heavy commissions.

"I have borrowed in all \$900,000. I obtained \$175,000 on my own note. A loan of \$240,000 was secured by me on the endorsement of a prominent New Yorker. The other \$485,000 I have mentioned before.

"I have been offered bail by a prominent and wealthy Cleveland man who wishes his name kept secret. I shall not accept freedom on such a condition."

HORSE IN A WELL.

Well Had to Be Dug Around to Rescue the Animal.

Randolph, May 18.—At four o'clock Tuesday afternoon a horse belonging to J. V. Newton, the truckman, was being driven at the rear of the National bank near the railroad when it broke through the cover of a gas tank and in a very few seconds the animal was sitting up rather uncomfortably at the bottom of the well, which is about 14 feet deep. The horse was wedged in so tightly that it had hardly any chance to struggle and for this reason the animal was unable to injure itself. A tripod and tackle blocks were put into position over the well. Ropes were placed around the horse and attempts made to hoist the animal which proved useless and this method was abandoned for the shovel and crowbar and the work of digging was carried on until within three feet of the bottom of the well, when the horse was pulled up the grade to the railroad track. After being in a cramped position at the bottom of the well for two hours the horse got on his feet and walked home without limping and yesterday was making the usual rounds with the truck wagon.

Three Years for Disobedience.

Privates William Ford and Thomas L. McCabe, Troop B, were taken from Fort Ethan Allen to Fort Jay, Governor's Island, N. Y., Tuesday evening, under guard of Sergeant Ralph O'Sullivan and Private William O'Sullivan, Troop B, to begin sentences of three years for disobedience of orders. Ford and McCabe were behind in their drill and First Lieut. George T. Bowman ordered them to drill with the recruit squad. The men thought, they being in the service some time, that the lieutenant was imposing on them and when the time came to get ready for the drill positively refused to saddle their mounts. The lieutenant informed them of the severe penalty for disobedience of orders. The men were placed in the guard house and a general court martial speedily met and heard their case. The sentence was returned Tuesday, approved. Ford is 25 years of age and enlisted in New York city in March, 1904. McCabe is 22 years of age and has been in the service for about 18 months. His home is in Boston, Mass. He was for a long time assistant to the post printer. Sergeant O'Sullivan and his brother, Private O'Sullivan, expect to obtain a furlough and visit their parents at Brooklyn, N. Y.

Rutland's New Station.

Clean and cool, the new waiting room at the Rutland railway station was opened to the public Monday morning, and many people visited it for the purpose of inspection. When the drive-ways are completed, the baggage, express and mail rooms will be moved into the new quarters. Probably this will take over two weeks.

Men are now at work in the north wing, preparing it, for the express companies. It is supposed to keep the waiting room scrupulously clean. Orders are that positively no drunks nor loafers will be allowed around, and all such will be ejected by force if necessary.

A clock has been put up over the newstand. It is white, like the waiting room finish. The mail boxes will be placed on a post on the platform just in front of the waiting room entrance.

Plenty of singing and dancing, woven into a strong play, mounted with beautiful scenery and excellent stage effects, go to make up the performance of "The Missouri Girl" at the Barre opera house Monday, May 22.

CARNEGIE INTERESTED IN INTERNATIONAL TOWN

Fantastic Scheme of Dr. Eykman to Build \$10,000,000 Community Near The Hague.

New York, May 19.—A London cable to the Sun says:

According to The Hague correspondent of the Telegraph, Andrew Carnegie is inclined to support a fantastic scheme of Dr. Eykman to build an international town near the The Hague, which will be entirely devoted to the arts and sciences and international fraternization. It is estimated that the cost would be \$10,000,000. The scheme is entirely distinct from the plan to build a peace palace.

SPAN 1,800 FEET LONG.

Quebec Cantilever Bridge Is to Break All Records.

Montreal, Que., May 19.—A record-breaking cantilever bridge is being built in Canada. The Quebec bridge is its name, and it will have a single span of 1,800 feet, no other bridge in the world being comparable to it in this respect.

The Quebec bridge will have a clear way of 150 feet above the water level. Its tower will be 360 feet above the river. The superstructure for the two 5000-foot anchor arm spans and the single 1,800-foot cantilever span over the channel will weigh 40,000 tons. The weights of the anchor and cantilever arms and of the suspended span are about 12,500,000, 15,000,000 and 6,000,000 pounds, respectively, while the floor system will add about 8,000,000 pounds to this.

The bridge is being built for the Quebec Bridge Company, of which the late premier of the Quebec provincial government is president. The company received bonuses from both federal and provincial governments. The total cost of the undertaking is estimated at \$3,800,000, and it is to be completed by the end of 1908.

The constructing will be according to American methods, no part of the structure being erected at the shops, dependence being placed on accuracy of design and workmanship. An American firm has the contract for the steel work and its construction.

When completed the bridge will have two railroad tracks, two highways and two electric car tracks on the single deck 120 feet above the pier tops between the trusses, besides the highway provision is being made for sidewalks, should such be desirable in the future.

Building at Northfield.

One new business block at least will be erected here this season. Dr. W. B. Mayo is soon to begin the work. The block will be 76 foot front, 54 feet deep and contain four stores on the first floor, with plate glass fronts and all modern conveniences. The building will be located on the north side of East street. One hundred feet on East street, from Main street will be reserved for future building purposes; from that point the new block will extend 76 feet east, the front being about on the line with the old Paine block, burned several years since. These stores will meet in a measure the demand for more business places and it is understood that two of them are already spoken for.

A transformer house has been erected by the village near the common and Slack granite plant and it to be moved to a point near the Moody & Almon steam electric plant as soon as the circuit is completely changed. The work of erecting the permanent brick building around the wooden structure of Moody & Almon will be begun in the near future covering it entirely and will be larger. When the brick structure is completed, the present one will be removed.

Alburt Is Growing.

Some idea of the growth of Alburt may be gained from the amount of building which has been done here during the past few years. These buildings include among others the following: House by Heman Marvin; three tenement houses of G. W. Sabre; store and hotel by N. K. Martin; store, telephone office and barber shop by M. L. Dean; a building including customs house, tenement, and dental office, by E. N. Goodsell & Co.; hotel by Ora Bell; dwelling house by Benjamin Mulley; Central Vermont railway station; water tank, modern coal chute, and round house for seven engines, by the Rutland Railroad Co. In addition to this there are in process of construction an Episcopal church, a public hall and tenement near the station by N. R. Lockwood; a house by G. W. Sabre; dwelling house by Joseph Boyer, meat market and dwelling by William Clement; dwelling on the site of the old blacksmith shop by William Jameson; a two-family house by Matt Thomas; dwelling and barber shop by D. Landrie. The Congregational society is contemplating building a new church near Peter Antine's house though no definite plans have yet been made.

Made Him Uneasy.

"There's just one thing I wanted to say to you," began Mrs. Acid to her better half.

"Only one, M'ia?" queried he, solicitously. "Aren't you feeling well?"

—London Tit-Bits.

DYSPEPSIA

"Having taken your wonderful 'Cascarets' for three months and being entirely cured of stomach and dyspepsia, I think a word of praise is due to 'Cascarets' for their wonderful composition. I have taken numerous other so-called remedies but without avail and I find that Cascarets relieve more in a day than all the others I have taken would in a year."

James McNamee, 99 Mercer St., Jersey City, N. J.
